Once again we have something for you.

The "Games Tips & Tricks Database" (GTT) distributed bei APC&TCP.

This database contains cheats, solutions, passwords and much more for over 1200 games.

The database is in German language and needs at least AmigaOS 2.x, a floppy drive and hard disk.

You can order the database (disc in a jewel case) now at our online shop for a symbolical price of 1 Cent while stocks last.
