AnimWebConverter is a program created with Hollywood(TM) 7.0 for MorphOS(TM), AmigaOS(TM) 4.x, AmigaOS3.x(TM), Windows(TM) and MacOS 10.4.2(TM) PPC.

A little and easy web tool to convert your old Amiga(TM) animations with the anim and yafa formats to web anim formats gif and apng, other feature to change the size of the animations to more biggest or littlest, also you can to between web formats, gif and apng, the tool not convert to Amiga(TM) formats. Also you can change the animation speed fast or slow.

This program also is a little animation player with extra options.

Features:

1. Resize the animation by percentage or by pixels width and height.
2. Converting an animation gif or apng between these formats.
3. Change the animation speed, it works with hundredths seconds, the delay time between frame set of 0.01 to 0.99 seconds.
4. Converting an Amiga anim or yafa formats to web animation gif or apng format.
5. Extract one frame from the animation and save it to: gif, jpg, lbm, png, bmp, jpeg2000, tiff.
5. Save the animation to video mpeg I.

New features v2.70 (22 March 2017):

1. Compiled with the last Hollywood version 7.0.
2. Bugs fixed.

Available in the next languages:

1. Spanish.
2. English.
3. Italiano.
4. French.
