Amiga Future: New full versions online

The download area of the Amiga Future was updated today. So, you can now find the following full versions online:

RIVA

<http://www.amigafuture.de/downloads.php>

An overview of the recent uploads and changes to the download database of Amiga Future is also available from this link:

[http://www.amigafuture.de/dl\\_recent.php](http://www.amigafuture.de/dl_recent.php)

Of course we also want to be able to offer you many more full versions online, but to be able to achieve this, for you, we need your help, so ...

We are on the lookout for the Copyright holders for Amiga games and applications.  
Do you know of any such person or can you actively help us in our search?  
If so, then please contact us by email.

We are looking for extra support in order to revise the full versions download area of the Amiga Future webpage.

In particular, to check whether all those full versions formats (ADF, IPF, WHDLoad, AGA, CD releases, etc.) are complete.

In addition, a short description, in 2 sentences or less, about each of their system requirements and some screenshots need to be created.

If you want to help us, then please send us an email.

APC&TCP: Has a newly revised online shopping experience for you.

As the online shop of APC & TCP has been completely revised over the last few days.

>From now on the Amiga Future subscription section has its own category.  
Hopefully, this will make it clearer and easier to complete your Amiga Future subscription.

Additionally, the various fonts/sizes have been modified in order to unify their appearance.

For browsers that understand CSS pages, the links are no longer underlined, which makes it easier to read the used fonts.

Last, but by no means least, the shop has been converted to utilise SSL (Secure Sockets Layer).

Support Amiga Future with Amazon

You want to support the Amiga Future webpage but don't want to spend money?

Just use the Amazon-Banner when visiting the Amazon webpage, if you want to order at Amazon.

For each order we receive a small commission. With this money we pay our extensive Amiga Future webpage.

hosting costs  
programming work  
and whatever else.

Simply use the banner or this link directly:

Deutschland: [http://www.amazon.de/?\\_encoding=UTF8& ... t=de&tag=amigafuture0a-21](http://www.amazon.de/?_encoding=UTF8&...t=de&tag=amigafuture0a-21)

Österreich: [http://www.amazon.at/?\\_encoding=UTF8& ... t=at&tag=amigafuture0a-21](http://www.amazon.at/?_encoding=UTF8&...t=at&tag=amigafuture0a-21)

Amiga Future: cheats database Update

The cheats database of Amiga Future is updates weekly by David Jahn, even at first sight if it is not immediately apparent.

The cheat database on the Amiga Future webpage is probably the biggest German collection for the Amiga.

This is not just about cheats. Many solutions, tips and tricks, as well as Freezer addresses can be found in this collection.

Meanwhile you can find more as 3400 Games Cheats and solutions in the database, and there is always more.

The database is currently completely in German. If we receive enough donations for the website, we have planned to integrate a proper online database, which will also be available in English.

New Amiga Software Database Updates

The Amiga Software Database (ASD) of Amiga Future updated again.

The ASD is a database in English and German which will include complete information to all released applications, CD-ROMs, literature and much more for the Amiga.

Of course the dataset is far from complete. Meanwhile there is already information to more than 4200 titles in the database. Moreover there have been already over 6500 images integrated with more to follow.

<http://www.amigafuture.de/asd.php>

Since our last report the following entries have been added or changed:

Amiga Future 125 - Magazines/Magazine - 05.03.2017 -
