Hyperion Entertainment is pleased to announce the immediate availability of the space-combat simulation [Descent: Freespace\\*](#) for AmigaOS 68k/WarpOS and AmigaOS 4.1 Final Edition from the [direct downloads section](#) of our website.

160) this.width=160" />

Customers can now choose between two formats of this amazing game:

a purely digital version at a price of only EUR 14.95 incl. VAT for download in our [restricted download area](#),

or buy a boxed version at their preferred Amiga dealer.

The downloadable content consists of an image of the original CD for AmigaOS 68k/WarpOS and an archived game drawer for AmigaOS 4.1 including all languages and manual.

Purchasers get a serial number inside their box or by email to register their purchase at our website in order to get access to our [restricted download area](#) for the game archive, the original ISO image as well as potential future updates. For a first look, free demo versions are available from the [public download area](#).

More information is available from the [announcement page](#).
