A new version of TuneNet has been released to [OS4 Depot](#)

Some highlights of this release include:

- * Improved CLI commands to be able to control TuneNet from 3rd party apps.
(allowing you to make full use of Multimedia keyboards etc..)
- * MP3 file streaming straight from the web.
(play instantly without downloading the file first)
- * Improved plugin API and new AIFF encoder.
- * Instant search as you type, arrow key and mouse wheel support.
- * Bug fixes to viusals in Dock only or CLI mode.
- * Additional titles within listviews.
- * Shuffle play, volume boost, more stations, better quality recording...
and more!...

Some plugins will require an update with this release (also available from OS4 depoy).

Enjoy and Seasonal greetings!
