APC&TCP takes over distribution of Reshoot and Reshoot R

APC&TCP is pleased to announce that the distribution of the well-known Amiga Games Reshoot and its successor Reshoot R has been taken over.

Reshoot is now available in the APC&TCP online shop.

In addition, a download version of Reshoot is now available directly from APC&TCP.

Resellers who want to offer Reshoot to their customers, contact APC&TCP via email.

Reshoot R is still under development and is expected to be released later this year.

<http://reshoot.apc-tcp.de>

<http://www.amigashop.org>

APC&TCP has been active as an Amiga publisher for over 25 years and always looks for good and interesting Amiga products for release. If anyone is interested in selling his product via APC&TCP ... just write an email.

Amiga Future: New full versions online

The download area of the Amiga Future was updated today. So, you can now find the following full versions online:

Foundation Gold ISO

<http://www.amigafuture.de/downloads.php>

An overview of the recent uploads and changes to the download database of Amiga Future is also available from this link:

[http://www.amigafuture.de/dl\\_recent.php](http://www.amigafuture.de/dl_recent.php)

Of course we also want to be able to offer you many more full versions online, but to be able to achieve this, for you, we need your help, so ...

We are on the lookout for the Copyright holders for Amiga games and applications.  
Do you know of any such person or can you actively help us in our search?  
If so, then please contact us by email.

We are looking for extra support in order to revise the full versions download area of the Amiga Future webpage.

In particular, to check whether all those full versions formats (ADF, IPF, WHDLoad, AGA, CD releases, etc.) are complete.

In addition, a short description, in 2 sentences or less, about each of their system requirements and some screenshots need to be created.

If you want to help us, then please send us an email.

Support Amiga Future with Amazon

You want to support the Amiga Future webpage but don't want to spend money?

Just use the Amazon-Banner when visiting the Amazon webpage, if you want to order at Amazon.

For each order we receive a small commission. With this money we pay our extensive Amiga Future webpage.

hosting costs  
programming work  
and whatever else.

Simply use the banner or this link directly:

Deutschland: [http://www.amazon.de/?\\_encoding=UTF8&...t=de&tag=amigafuture0a-21](http://www.amazon.de/?_encoding=UTF8&...t=de&tag=amigafuture0a-21)

Österreich: [http://www.amazon.at/?\\_encoding=UTF8&...t=at&tag=amigafuture0a-21](http://www.amazon.at/?_encoding=UTF8&...t=at&tag=amigafuture0a-21)

UK: [http://www.amazon.co.uk/?\\_encoding=UTF8&...kCode=ur2&tag=amigfutu-21](http://www.amazon.co.uk/?_encoding=UTF8&...kCode=ur2&tag=amigfutu-21)  
France: [http://www.amazon.fr/?\\_encoding=UTF8&...ode=ur2&tag=amigfutu0a-21](http://www.amazon.fr/?_encoding=UTF8&...ode=ur2&tag=amigfutu0a-21)

The Amiga Future magazine - Issue 132 preview is now available to view online

This is the full colour preview and excerpts of the Amiga Future issue 132 (May/June 2018) can now be viewed online on the Amiga Future website.

Some of the interesting articles in this issue are:

Special CD or not CD  
Show Report DoReCo  
Review Golden Wing

Of course there's so MUCH more actually in the magazine.

Needless to say you often get other versions of software, often what was commercially available, as well as some of the latest try-outs or freely released software applications and games for, hopefully, all of the Amiga type Operating systems, so that's Amiga 'Classic', OS4, MorphOS, and AROS, including some PD software for these systems, all on the Readers' cover CD.

A detailed description of content and excerpts of this current issue can be found at:

<http://www.amigafuture.de/kb.php?mode=cat&cat=13>

The Amiga Future magazine is available as an English and German printed magazine - every issue is available in FULL COLOUR - directly available from the magazine editorial office and also from various other Amiga dealers.

Preview: <http://www.amigafuture.de/kb.php?mode=cat&cat=13>

Orders: <http://www.amigashop.org>

Amiga Future Everywhere: Android App Update released

The Amiga Future News App for Android released in the Version 1.0.4. You can download the Version on Playstore.

Changes:

- HTTPS support
- bugfix: US news were updated based on german news channel time
- bugfix: news item list now updated each time the app is brought to foreground

The app has been extensively tested on many different mobile phone models. Nevertheless, mistakes can occur. We kindly ask you to report these directly to us so that we can eliminate the errors promptly.

A great thank you goes to the programmer Wei-ju Wu and Martin (Mason) Merz for the great graphics.

Also a great thank you to the many beta testers.

Amiga Future Webpage and SSL

In the next weeks we have to change [www.amigafuture.de](http://www.amigafuture.de) to SSL.

Unfortunately, Amiga browsers like to have a problem with this.

Here we want to show you some tricks of Rotzloeffel from the A1k so that you can continue to use the Amiga Future webpage on the Amiga:

First you install, if not already done, the following:

1. AMISSL 3.6 - AmiSSL Homepage: <http://www.heightanxiety.com/AmiSSL/>
2. then an update of AMISSL 4.x - Aminet-Link: <http://aminet.net/search?query=amissl>

The version lbrowse 2.4 does not support AmiSSL 4! Only a few older versions of the certificates will be renewed!

- -> An update of lbrowse 2.5 is vegetating on <http://www.ibrowse-dev.net> ... will it ever be released?

Many sites encrypted with SSL still offer encryption with TLS1!

You can change the preferred encryption in AmiSSL to just this TLS1 and if the site offers it, which many do, the previously rejected site is opened without any problems.

For this the env-variable `ssl_client_version` has to be set

In CLI you enter the following commands one after the other:

```
makedir env:amissl
setenv amissl/ssl_client_version tls1
copy env:amissl envarc:amissl all
```

In the drawer `envarc:`, which is located on the hard drive, all env-variablen are stored and copied to the ENV: directory at system startup, which is typically found in the RAM.

Amiga Future: cheats database Update

The cheats database of Amiga Future is updates weekly by David Jahn, even at first sight if it is not immediately apparent.

The cheat database on the Amiga Future webpage is probably the biggest German collection for the Amiga.

This is not just about cheats. Many solutions, tips and tricks, as well as Freezer addresses can be found in this collection.

Meanwhile you can find more as 3400 Games Cheats and solutions in the database, and there is always more.

The database is currently completely in German. If we receive enough donations for the website, we have planned to integrate a proper online database, which will also be available in English.

<http://www.amigafuture.de/GTT/GTT.php>

<http://www.amigafuture.de>

Since our last report the following Updates have been added:

27.04.2018 - Bubble Bobble - Freezer NEU!

New Amiga Software Database Updates

The Amiga Software Database (ASD) of Amiga Future updated again.

The ASD is a database in English and German which will include complete information to all released applications, CD-ROMs, literature and much more for the Amiga.

Of course the dataset is far from complete. Meanwhile there is already information to more than 4200 titles in the database. Moreover there have been already over 6500 images integrated with more to follow.

<http://www.amigafuture.de/asd.php>

Since our last report the following entries have been added or changed:
