The excerpts and preview of issue 79 (July/August 2009) of the Amiga Future are online now.

Again the magazine includes many articles like a review of AmigaOS 4 on the SAMflex (part 2), AmigaOS 4 on Pegasos, Digital Universe, Filer, BOH and much much more.

Besides many full versions and PD software on the cover CD you'll find the full version of Wasted Dreams.

A more detailed description of content and excerpts can be found at:

<http://www.amigafuture.de/kb.php?mode=article&k=3139>

The Amiga Future is available as an English and German print magazine directly at the editorial office and some Amiga dealers.

The Amiga Future can be obtained as a single issue and subscription each with or without a cover CD.

We ask all users interested in the magazine to order it as soon as possible.

Amiga Future needs help.

We need translators for the magazine. Your native language should be German or English. Of course you should be able to both read and write well.

If you are interested please contact as via email at: Andreas@amigafuture.de
