@kas1e Quote:

I didn't see sources of 1.24 online

After \$7627 was raised for the Odyssey bounty, I thought Fab was going to release the source code of all future versions of Odyssey:

<https://power2people.org/projects/odyssey/>

Quote:

If this project is successfully funded, and as long as the resulting ports stay true to the original version of the Odyssey Web Browser in terms of user experience and feature sets, Fabien Coeurjoly plans to share all source code that he will develop himself for future versions of Odyssey Web Browser for free.

I therefore assumed that OS4 being stuck on Odyssey 1.23 was due to our developers (esp. you) being rather busy...
