If you check the wookiechat front page, jahc announces in April 2013 that he is not working on WookieChat any more. A WookieChat repository was set up at SourceForge in May 2013 by deadwood. There are MOS & AROS makefiles in the sources but no OS4 makefile. It's unclear if deadwood made changes to the sources before adding them to the repository but an interested programmer could check with him and try to get the code working for OS4 again.
