@xenic

debug.c/line 349:

```
#ifdef __amigaos4__  
#include <clib/debug_protos.h>  
//#define RawPutChar(chr) kputc( chr )  
#endif /* __amigaos4__ */
```

As i got "undefined reference to `kputc'" I changed to use Exec 'RawPutChar()'

BTW would

```
#define RawPutChar(chr) DebugPrintF( chr )  
work too?
```
