I have also a very long startup time maybe related to fontconfig problems and I am investigating on this issue

I have slow startup times too - it's fontconfig.

Unfortunately fc-cache appears to be completely broken in FEU1, which was my usual fix.

@alfkil Any chance you can ditch libfontconfig? Is it still needed with the AmigaOS font renderer?

libfontconfig has to be my most hated library. All it appears to do (on OS4 - I'm sure it's great elsewhere) is make things take ages to start up 😞
