[Fixed] OS4Depot no-longer searchable using a URL (Odyssey search box)

Author: : ChrisH

Date: : 2017/4/9 22:55:24

URL:

I used to be able to search OS4Depot using Odyssey's built-in search box. Can't remember whether the OS4Depot option was built-in (like Google), or if I had to add it myself.

For example, the following URL *used* to search for "SMTube":

<http://os4depot.net/index.php?function=ol=simple&fields=smtube>

But now it gives an empty search result. It seems that the "f_fields" parameter is now ignored.
