You are passing it incorrectly.

Just launch SmTube and copy/paste the URL in the search field (or you can search for words to get a selection of videos).

I'd advise to use either LiveForItMplayer or Emotion to play videos

Had no luck with LiveForIts mplayer, but Emotion is really nice. Do you know where I can purchase the full client? The website in the demo is now not operational.

I contacted a software dev company at the webiste <http://entwicklers.org/contact/> which I assumed had to be the right location, but if you know how I can get in contact with them I'd be grateful.
