URL:

"uploader" is back. This time supplying someone elses email when uploading. (kas1e's email in this case)

These files have been uploaded by this "uploader":

If anyone knows anything about who is behind this IP then let me know:

IP: 2.40.79.183

Domain Name: net-2-40-79-183.cust.dsl.teletu.it

Location: Modena, Emilia-Romagna in Italy

Connects to a router running OpenWrt

Browsers used from the IP:

Odyssey Webbrowser on AmigaOS 4.1

Firefox on Windows

Any idea how to tackle this? The next step would be to verify all uploads via email ...
