URL:

Hi, I was able to configure IBrowse 2.4 OEM for https: // I would like to use it with yt.rexx

Do I need more plugins from the IBrowser site? to make it work?

or just just configure yt.rexx?

At the moment, SMTube works very well with MickjT-Mplayer

here a little video:

<https://youtu.be/H5d3q07mGYs>

I apologize for the link but it is to show that it works, so I hope it works the same way with IBrowse

Thanks for any response and suggestions from you, I consider this site a reference point for OS 4.1 fe1
