@Severin

The reason there's been no update is because everything works here and no-one has reported any bugs. I can only fix things I know about :) I've sent you an e-mail.

Also, you need to be using 1.5. If you're still using 1.4, then not much will work with default settings.

@white

If the links don't work in IBrowse, but you can Copy them to clipboard and they work in Odyssey, then the issue is SSL with IBrowse. You can still use the AutoPlay option that YT.rexx has and make a "Play with YT.rexx" menu option. Check YT.guide for instructions on setting that up.

Edit: Remove unnecessary snarkiness :)
