Thanks for the example

with these settings:

c: run data:YT/YT.rexx %l Silent Autoplay

the output is invisible

but returns this output:

cli5

but the video does not start immediately, it seems slower.

But I'm happy the same 😊

Okay I will continue to read the documentation, thanks you made me understand where to add the command to run it.

If you have other suggestions I accept them willingly.

Thanks!
