@MickJT

Thank you for your patience and the explanation of ffplay.

I corrected the script.

And thanks again for your player works really well with SMTube, I also corrected the output in the smtube.ini file

Now everything works transparently and without output windows

I wanted to ask you there is a possibility of using YT.rexx in a website when is it posted, for example, a video linked directly to youtube?

such as in this case:

<http://eab.abime.net/showthread.php?t=89887&page=2>

(show youtube player)

Thanks again!
