That's pretty cool 😊

Just a question, having BlitzMax in the future is there any chance to facilitate other related projects like Monkey-X ?

Still there a pre-alpha port of Monkey-X to Amiga (called AmigaMonkey) but unfortunately it still in pre alpha stage and it never progressed since then

Maybe the two projects could be "merged" in some way ?

Here the alpha code: <https://github.com/bruZard/amigamonkey>

And here the official page of the project: <http://www.amigamonkey.de/>
