To build latest sdl1 sources with sdk53.30, there need to be added that to the SDL_os4video.h for example

```
#ifndef MAX_DOS_PATH  
#define MAX_DOS_PATH 4000  
#endif
```

```
#ifndef MAX_DOS_FILENAME  
#define MAX_DOS_FILENAME 255  
#endif
```

So i compile it, and test : icon takes fine only when i run it from exactly that place where i in. For example, if i go to the shell, icon grabs fine only when i inside of directory where binary placed. But if i for example go to RAM: , and do something like:

Quote:

```
RAM:> work:uae/uae -f work:demos/demo/demo.rc
```

Then instead of real icon i have some default os4-app icon.
