URL:

I have/use this one on my SAM460ex:

Dev type : KINGSTON SVP200S37A120G

Remov Dev : no

Remov Med : no (probably harddisk)

Revision : 502ABBF0

Serial # : 50026B722B01DA88

LBA : yes

Tot. Secs : 234441648

Tot. Size : 120034123776 bytes, 117220 mbytes, 117 gbytes

No problems so far.

But with this one: KINGSTON SA400S37/240G system doesn't boot from it on my sii3114ide.device pci controller, using internal SAM460 sam460sata.device boots ok.
