Now I do not remember the reason why I made this assignment and certainly the result of testing to make it work, thanks for your suggestion.

I solved now SMTube works perfectly even with the video download without crashing

I have tried many times downloading videos, it always works.

I had to put the paths of SMTube / Download exactly

this the SMTube.ini file I'm using works very well

```
<MPLAYER>Work:MickjT-MPlayer/mplayer-nonaltivec -vo sdl -ao sdl
```

```
<MPLAYER_OPTIONS>
```

```
<CONSOLE>0/400/640/400
```

```
<FFPLAY>APPDIR:ffplay
```

```
<FFPLAY_OPTIONS>-infbuf
```

```
<FFMPEG>APPDIR:ffmpeg
```

```
<FFMPEG_OPTIONS>-b:a 128k
```

```
<FFMPEG_OUTPUT_TYPE>MP3
```

```
<DOWNLOADER>Work:SMTube/Amiga/Download/Download
```

```
<DOWNLOADER_OPTIONS>DEST
```

```
<DOWNLOADER_DEFAULT_EXTENSION>MP4
```

```
<DOWNLOADER_DEFAULT_PATH>Work:SMTube/Amiga/Videos
```

```
<DEBUG>OFF
```

```
<WAIT>OFF
```

```
<SECONDS>3
```

I would like to ask for a tip, it is possible to somehow increase the loading speed of SMTube during start-up takes a few minutes before the program appears.

Thanks again!
