@samo79

I think the 5.61 version is for the full WinRAR/RAR distribution (?) and the 5.6.8 version is for the free unrar.

I did some work on porting unrar 5.6.8 and it is now compiling and almost linking apart from three undefined dependencies which I still need to fix:

Quote:

```
ppc-amigaos-g++ -O2 -g -Wall -Wno-parentheses -Wno-switch -Wno-dangling-else -Wno-unused-variable

collect2: error: ld returned 1 exit status
makefile.amigaos4:32: recipe for target 'unrar' failed
make: *** [unrar] Error 1
```

I also haven't yet moved all the Amiga specific changes from the 3.9.8 port to this version yet.
