Hello thanks for this highlight of my work for your amigaNG

For the EGL_wrap examples, did you click on the SDK installer because it installs the includes and the library in your SDK

Then did you install the opengles SDK and NOVA warp3d

Thank you for giving me more information so that I can help you better

For the evolved version of rtcwNG yes it will be for MINIGL and NOVA so it will run on old and new machines

At first the single player version will be released and will follow the multiplayer version

Thank you

HunoPPC
