In Italy we said. why you have to wrap your head before you have broken it ?

I mean let's see how it evolve, as for 1.24 yeah it's not a big update compared to 1.23, however it's better than nothing 😊

As for the current version, well what we miss are the speelcheck library and the of course a fixed video support .. something can be done with them while we wait (and hope) for future versions ...
