At moment can't build working minigl.library from latest sources, but there is builded one by Daniel , just without few new fixes:

[http://www.hyperion-entertainment.com ... c/precompiled\\_binaries.7z](http://www.hyperion-entertainment.com ... c/precompiled_binaries.7z)

Take ones from libs/ppc.

For me with that one i run 20 instances of testgl without problems. So, probabaly its your hacked minigl cause that on your setup
