Regarding the image/png error when building scummvm/residualvm with SDL1/2.

Answer from one of the maintainers:

Quote:

Whoever is in charge of this part of the AmigaOS SDK needs to be notified it's not a good idea to name their things Image and such as it's bound to conflict with application code...

And bug thread [here](#)

Just for your information, since this is a SDK issue i'll open an issue report there too.
