@All

I want to made another release of dopus5, as since 5.91 version we made good progress with bug-fixing and some new things added. Most of hardcore work was done by Xenic for os3/os4 version, and by Itix for MorphOS version.

That mean all that work collecting dust for last 3 years, and as there was good bunch of fixes i think its time to made a proper 5.92 release.

So, everyone who have time and interest, plz give a go to test latest beta version of latest commit we has, just to be sure we didn't broke anything since 5.91.

There is link on djbase's mirror of last beta builds from where you can grab version you want to test:

<http://dopus5.amigaworld.de/>

Thanks !
