Maybe os4depot release then ?

We probabaly need to ask Orgin to delete those ones from os4depot.net:

sdl-clib2.tar.bz2

sdl-diff.gz

sdl-newlib.lha

sdl-shared.lha

sdl-src.lha

And upload just one single our new one. As it have and shared version inside, and src are on github since long time, and diffs also have no needs to be there anymore, and clib2 also very much dated.
