I tested on my X5000/40 and I couldn't reproduce the problems as are described at

<https://sourceforge.net/p/dopus5allamigas/bugs/63/>

The only thing that I saw is that the images open in Workbench screen, but the texts open in DOpus screen.

Tried two different USBs FAT32 formatted. Also, tried multiple different txt and jpg/png files.

I have dos v54.87
