@billt

The manual says it's possible to populate 4x4GB, giving a max of 16GB.

I don't understand enough of electronics, but I guess this is all the hardware can handle.

And yes, it would be so cool if we could use the extra memory and get an enhanced system after such a long waiting time...

Would be my No. 3 on the XMas wish list, right after support for the second CPU core (1) and support for onboard LAN (2)...

Ah well, good thing Santa isn't real
