I tried the SynergyClient from the UHC-Tools, did not now about the UHC-Tools at all, Thanks! 😊

It connect well but I did not manage to make any of the Amiga keys work.

All the settings on the server side regarding "Shift, Alt, Control, Meta and Super key" are apparently ignored on the Amiga Side.

Ctrl and Alt do what they are supposed to do however.

The Mouse scrolling is ignored too, it was working with asynergy 2.0 (2006 version from os4depot). I could get used to work without mouse scrolling, but not without the Left and Right Amiga keys.
