Dunno from where you got the binary, but as i don't put it for public mean its not ready for anything. For audio try to set stack size for 1 or 2mb , for others - its not my code, i only port what 68k guys do :)

If you wish, you can put bugreports there:

<https://github.com/AmigaPorts/devilutionX>

But i don't know how they open to handle os4 port or make any changes because of it. You may try to create tickets about
