URL:

@white

You're still trying to parse to Emotion player an URL that did'nt point to a video file. Copy this script:

```
/* REXX Play_video_menu */
```

```
options results
```

```
parse arg url
```

```
url=strip(strip(url),'B', '')
```

```
/*Test url*/
```

```
SELECT
```

```
  WHEN (substr(url,1,23) = "https://www.youtube.com") THEN website = "Youtube"
```

```
  WHEN (substr(url,1,16) = "https://youtu.be") THEN website = "Youtube"
```

```
  WHEN (substr(url,1,21) = "https://www.twitch.tv") THEN website = "Twitch"
```

```
  WHEN (substr(url,1,19) = "https://m.twitch.tv") THEN website = "Twitch"
```

```
  WHEN (substr(url,1,17) = "https://mixer.com") THEN website = "Mixer"
```

```
  WHEN (substr(url,1,17) = "https://vimeo.com") THEN website = "Vimeo"
```

```
  WHEN (substr(url,1,27) = "https://www.dailymotion.com") THEN website = "Dailymotion"
```

```
  WHEN (substr(url,1,20) = "http://www.skaitv.gr") THEN website = "Skaitv"
```

```
  WHEN (substr(url,1,16) = "https://dlive.tv") THEN website = "Dlivetv"
```

```
  OTHERWISE website = "Other"
```

```
END
```

```
/*Notify Result*/
```

```
address RINGHIO 'REGISTERAPP APP=NOTIFYTEST'
```

```
SELECT
```

```
  WHEN website = "Youtube" THEN address RINGHIO
```

```
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Youtube.png" TITLE="Youtube Video" IMGVALIGN=1 Now playing!'
```

```
  WHEN website = "Twitch" THEN address RINGHIO
```

```
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Twitch.png" TITLE="Twitch Video" IMGVALIGN=1 Now playing!'
```

```
  WHEN website = "Mixer" THEN address RINGHIO
```

```
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Mixer.png" TITLE="Mixer Video" IMGVALIGN=1 Now playing!'
```

```
  WHEN website = "Vimeo" THEN address RINGHIO
```

```

RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Vimeo.png" TITLE="Vi
meo Video" IMGVALIGN=1 Now playing!
  WHEN website = "Dailymotion" THEN address RINGHIO
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Dailymotion.png" TITLE
="Dailymotion Video" IMGVALIGN=1 Now playing!'
  WHEN website = "Skaitv" THEN address RINGHIO
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Skaitv.png" TITLE="Ska
itv Video" IMGVALIGN=1 Now playing!'
  WHEN website = "Dlivetv" THEN address RINGHIO
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Dlivetv.png" TITLE="Dli
veTV Video" IMGVALIGN=1 Now playing!'
  OTHERWISE address RINGHIO
'RINGHIO APP=NOTIFYTEST SCREEN="FRONT" PRI=9 IMG="[PATH OF THE ICON]Other.png" TITLE="Dire
ct Video" IMGVALIGN=1 Now playing!'
END

```

```
'UNREGISTER APP=NOTIFYTEST'
```

```
/*Lauch script*/
```

```

SELECT
  WHEN website = "Youtube" THEN address command '[PATH OF THE SCRIPT]YT.rexx' url
'ssl html odyssey autoplay silent'
  WHEN website = "Twitch" THEN address command 'C:Python [PATH OF THE SCRIPT]twitch.py -shh -u ' url
  WHEN website = "Mixer" THEN address command 'C:python [PATH OF THE SCRIPT]mixer.py -shh -u ' url
  WHEN website = "Vimeo" THEN address command 'C:python [PATH OF THE SCRIPT]vimeo.py -shh -u ' url
  WHEN website = "Dailymotion" THEN address command
'C:python [PATH OF THE SCRIPT]dailymotion.py -shh -u ' url
  WHEN website = "Skaitv" THEN address command 'C:python [PATH OF THE SCRIPT]skaitv.py -shh -u ' url
  WHEN website = "Dlivetv" THEN address command 'C:python [PATH OF THE SCRIPT]Dlive.py -shh -u ' url
  OTHERWISE address command 'C:mplayer -cache 8192 ' url
END

```

Also Edit the script and replace [PATH OF THE SCRIPT] with the correct path of yours (ram:script/ for example) with out the bracket.

Mine look like this one :

```

WHEN website = "Dlivetv" THEN address command
'C:python Work:Internet/Odyssey/Plugins/Dlive.py -shh -u ' url

```

Same thing for the Ringhio icons for the different streams. Mines are small png picture placed in a icones drawer. My path looks like this:

Work:Internet/Odyssey/Plugins/Icones/Youtube.png for youtube icons.

Regards,
