@Hans

Indenting a block of text is possible now.

Highlight the block, and use the key-combo defined, or use the Indent menu item.

Auto-suggestion is, of course, possible, but as you can see there are a few issues that need to be sorted out properly before I start adding any more features. There are lots of things I want to add, but I need to keep it under control with the bugs etc.

Yes, I find the Quick-Link invaluable, I am thinking about extending it further.

Simon
