Hi!

Another serious problem on my system is that texteditor.mcc is not working.  
Mui prefs said: "Failed to create edit class"

It is the latest OS4 version from sourceforge.net

```
5.Workbench:> version mui:Libs/mui/TextEditor.mcc
```

```
TextEditor.mcc 15.19
```

```
5.Workbench:> version mui:Libs/mui/TextEditor.mcp
```

```
TextEditor.mcp 15.19
```

```
5.Workbench:>
```

Is there anybody here who has no problem with YAM on OS4 final?
