In case that you have installed an external version of IBrowse, have you properly got 68k MUI classes.

Try to install the OS4 version of NList, NListView, NFloattext, NListviews, NListtree and NListtree:

[http://os4depot.net/index.php?function=library/mui/mcc\\_nlist.lha](http://os4depot.net/index.php?function=library/mui/mcc_nlist.lha)

Also install those classes just in case (they are not included in IBrowse, but needed by some of your software):

[http://os4depot.net/index.php?function=library/mui/mcc\\_toolbar.lha](http://os4depot.net/index.php?function=library/mui/mcc_toolbar.lha)

[http://os4depot.net/index.php?function=library/mui/mcc\\_texteditor.lha](http://os4depot.net/index.php?function=library/mui/mcc_texteditor.lha)
