Comparing crosDOSfilesystem 4.1 and 4.1.1, the 4.1.1 version 53.3 (20.3.09) 103832ko is newer than the 4.1 version.

Hope problems with FAT95 have been resolved with 4.1.1.

Recognized and worked fine device on SAM440EP+4.1.1:

Console game:

- PSP FAT V1000.

Multimedia players:

- Cowon I7 firmware V1.18
- Cowon A2 firmware V1.73E
- Cowon X5 firmware V2.10E

External card reader:

- Hama cards reader 19 in 1 (crystal blue case).
- Noname 6in1 card reader (made in taiwan - grey case).

Not working:

HD 80go 2,5" LACIE.

on the log: recognized and initialized but no:

masstorage Lun0 has device type 0x00 (.....).

I think my 2 others HD will not work also (not tested).
