This problem arrive often during my AOS4.1 use also. I have made a special thread about this problem.

<http://www.amigans.net/modules/newbb/ ... =ASC&type=&mode=0&start=0>

I'm so diseapointed that I could said bad words about the amiga for the first time in public !!! 😞

The incredible thing is my classic with spider2 is 100% reliable about USB, thanks to the great poseidon software.

- IMHO, It's when writing the file on the FAT32 media the problem came.

- all tests made by manufacturer or PC or SAM FAT32 format make the crash.

- Maybe 8-10 directories and maybe 30-40 files on the medias with no strange characters inside filenames.
