@desler

Not that i have tested it yet (im not in front of my Amiga), but ill just throw in my first (and for me biggest drawback) feature request.

Would it be possible to add copy and paste (from "outside" --> clipboard as well as inside --> CW) as well as drag and drop to the main window?

I will get back to you when i had the chance to test CW throughoutly

Thanks a bunch or the new and updated version

Thumbs way up
