And Cool`s WB Improvement:

Workbench has to be replaced with something like Ambient or improve (e.g. dual listing, avi priviews etc) Filer and integrate it to the system.

You can already see what for users would be good enough - even for up to OS 5.0 😊

Mind that 4.2. would have to be new paid version probably, and would like to see at last some of those features. For X1000/RadeonHD drivers 4.1.3. would be enough 😊
