@djrikki

I think it is a mistake to claim that TW will be available soon. We already know that there are many vultures waiting for failures or no shows in our little piece of the NG Amiga market place. I think it is better to wait for the official announcement "when it's done".

Meanwhile we have several choices for OS4 ...

AWeb APL Lite 3.5.09 for OS4.0 PPC

IBrowse 2.4 OEM-Version

NetSurf 2.5

NetSurf 3.0 (Development)

OWB 3.30

Timberwolf Alpha 1 release

I have all of the above installed on my system, but I use OWB and NetSurf the most these days. Timberwolf needs some work. That is why it is officially classified as an alpha release.
