Oh that's it then.

No 320 screenmode, I use DDC and the first resolution is 640x480.

I tried to revert to "without DDC" but I can't remember how it worked without. I have no Monitor with DDCMODE enabled but I still can't add other modes.... :-/

Quote:

Would be \*great\* if OS4 actually fixed this (IMHO serious) flaw

Well if you can give me more information, a test case or even a small program that shows the problem, I'll fill a bug report.
