Ok I used GPatch instead, it works really great. So now the patch is up on Os4depot! Looking forward to hear, if it actually works or not 😊.

The good news is that your patch works and I can play Napalm like the beta's you e-mailed me 😊

The not so good news is that I when I try to save the save name fills up with "======" signs like you are holding the key down even if you don't press any keys.
