I use PuTTY at work and I'd be interested in a port. However you know I am principally an AROS guy and I'd prefer if PuTTY would be ported also to it. Since most AROS developers use Linux machines for a reason or another, they may be very interested too. If an AmigaOS 4.x port of PuTTY would be a good way to have it on AROS too, well, I can't be more interested. Thank you.
