Using a MicroA1 (256mb RAM) here and i haven't yet had the chance to get my hands on any Timberwolf Beta. It always crashes when the opening screen splashes. I have submitted the last Crash log i got here

[http://crashlog.os4depot.net/index.php ... ction=view&crashlogid=332](http://crashlog.os4depot.net/index.php?option=view&crashlogid=332)

I'm running AOS 4.1.4. Any ideas on what i should check and tweak?
