Yeah, it is known. Before posting any bug, check the list of already reported (to not give programmers not-need it overhead). For example clipboard problems which you mention already reported here:

<http://bugs.os4depot.net/?function=viewissue&issueid=696>

As for bug reporting, after you register, and go to the TW area, at the top you will see small tab called "add issue" : that it. But check firstly already reported bugs as i say.
