How do I organise my saved bookmarks, I have lots of bookmarks and have created folders but how do I move the saved bookmarks to the folders?

Looks like TW keeps its bookmarks in a file,  
Timberwolf/CurrentUserProfile/.mozilla/firefox/Profiles/(numbers).default/places.sqlite  
Which is 1081344B in size.

Saving that file someplace and copying it to a new installation is how I backup my bookmarks. at least for now.
