Everything gets looked at eventually. Any issue in particular that you have in mind here? If this is about the GUI element updating, I **think** it has been fixed in the meantime.

Yes, it was GUI elements not updating, which is currently shown as NOT fixed:

<http://bugs.os4depot.net/?function=viewissue&issueid=742>

Right, this specific bug I think depends on the history function which for some reason doesn't work. I might take a look at it today if I get the time (unless Thom already fixed it earlier).

I agree this bug should be fixed.
