It won't work for me, either. For me the button is always ghosted. It was in all the previous versions of TW, too.

I already reported this (and related problems) here:

<http://bugs.os4depot.net/?function=viewissue&issueid=742>

And from what little testing I've done, the latest version of TW seems much less stable than previous releases (probably because they totally rewrote how multithreading was handled).
